

Seven Key Components Of Trump's Tax Reform Plan

On November 8, 2016, Donald Trump was elected the 45th president of the United States, culminating a two-year campaign. It is expected that it will take considerably less time for the former business mogul to push tax proposals through a Republican-led Congress. Although these provisions likely will be tweaked during congressional debate and negotiations, here are seven key items on Trump's tax agenda:

1. Individual tax rates. One cornerstone of Trump's tax plan is a restructuring of individual income tax brackets. The seven-bracket system now features a bottom tax rate of 10% and a high of 39.6%. Trump would replace the system with one having just three tax brackets: 12%, 25%, and 33%. Most taxpayers could pay less with this structure, but the largest benefits will be for those in the higher tax brackets.

2. Corporate tax rates. Another consistent theme in Trump's campaign was a pledge to reduce corporate income tax rates. Corporations currently pay tax at rates as low as 15% and as high as 35% (with a 38% bubble on some income). Under Trump's plan, all businesses would be taxed at a 15% rate, providing a tax cut to the majority of corporations. At the same time, Trump hopes to eliminate "double taxation" for C corporations, while preserving benefits such as liability protection.

3. Itemized deductions. Although Trump is offering tax relief to individuals with one hand, he would take it away with the other by eliminating some itemized deductions or limiting the total amount of itemized deductions. However, exceptions could be carved out for certain deductions, such as those for charitable donations and mortgage

interest. The loss of the state income tax deduction could have an adverse effect on upper-income residents of states with high tax rates, such as California and

New York.

4. Business write-offs. Under Section 179 of the tax code, a business currently may deduct up to \$500,000 of the cost of assets placed in service during the year, subject to a phase-out threshold of \$2 million. Plus, a business may be entitled to a bonus depreciation of 50% on qualified property. As part of his plan to boost business growth, Trump would double the Section 179 deduction to \$1 million and provide an immediate deduction for business investments. This could be accompanied by a repeal or modification of the depreciation rules.

5. Estate taxes. Trump has proposed to repeal the federal estate tax. In addition, he has called for eliminating the tax rule allowing heirs

Attention All Parents: Secure Your Mask First

When flying, have you ever listened to the pre-takeoff safety demonstration? If you're not distracted by the screaming baby behind you or the couple arguing over the window seat next to you, you'll hear flight attendants explain what to do in the event of lost cabin pressure: "Secure your own oxygen mask before helping your child." Why? If you don't take care of yourself first, you won't be able to help anyone. You're already gone – leaving your child alone to fend for themselves.

Parents instinctually want to protect their children, whether it is from physical harm or financial hardships like massive student loans or unmanageable expenses. Wanting to provide for a child's education and other expenditures is noble, but often causes parents to sacrifice their own financial well-being. Despite good intentions, parents who don't save enough for retirement often need to rely on their children for support later in life, which could place a financial and emotional strain on them and their families – who should be focusing on saving for their own retirement.

Balancing your own interests versus those of your children is a struggle every parent experiences. But what they'll remember most is not the bills you paid or the gifts you bought; it's the example you set by making responsible decisions to ensure your own financial independence. Work with us to make sure your financial oxygen mask is secure before assisting your children with theirs.

Three Ways To Defuse Estate Rifts

It's impossible to know what will happen to your family after you're gone, but it's doubtful you're envisioning a bitter squabble over your possessions. Yet many a family is torn asunder when a patriarch or matriarch leaves this world.

Although there are no guarantees the claws won't come out, here are three documents that may reduce the potential for a serious rift:

1. A will. Virtually every adult with assets of any value needs a will. Typically, a will is the centerpiece of an estate plan and covers everything from appointing guardians for young children and addressing estate tax issues to determining who will receive your most valuable assets. A will gives you the opportunity to spell out who will inherit the beach house or expensive jewelry as well as other items of sentimental value.

A properly executed will is legally enforceable, so it's crucial that yours meets all of the technicalities of your jurisdiction. If you have significant assets you'll probably need to hire an attorney to draw up the document. It's likely that it

will need to be updated in the future as your family circumstances change.

2. Personal property memorandum. Your will likely won't cover every last trinket you own, and it's a hassle to revise it all the time for minor changes. A personal property memorandum can supplement a will and may be referred to in the will itself. The memorandum can list all of your personal assets and your intended beneficiary for each item.

More than half of the nation's states have laws recognizing a personal property memorandum as legally binding. To avoid confusion, include a detailed description of your property. Make sure your executor has

an official copy of both the will and the memorandum.

3. Letter of instruction. This is the last piece of the puzzle. Although a letter of instruction isn't legally binding, it can clarify certain issues and provide additional guidance to your heirs. The letter may include:

- The location of important documents, such as your will, insurance policies, titles, and deeds;
- Details of cemetery plots and funeral arrangements;
- Contacts for legal, tax, and financial information;
- A list and descriptions of all financial assets, including savings and checking accounts, stocks, bonds, and retirement accounts;
- The location of your tax returns for the past three years;
- The location of safe deposit boxes and keys; and
- Other special

requests (for example, preferences for grandchildren attending college).

Last, but not least, your family members need to know about these three documents and where to find them. ●

Do Roth IRA Math Before Converting

The Roth IRA conversion has been one of the most popular retirement planning techniques in recent years and there's nothing to indicate that this trend will change. The main attraction is that the money you take from a Roth after the conversion is generally free from income tax and you don't have to dilute your nest egg with required minimum distributions (RMDs) as you do with traditional IRAs. For many retirement-savers, it's a good deal.

But the benefits of Roth IRAs come at a price: When you convert funds in a traditional IRA to a Roth, you must pay tax on the conversion

amount, just like you would with a regular distribution from an IRA. The trick is to minimize the tax liability when you pull off this maneuver.

Normally, withdrawals from a traditional IRA are fully taxable at ordinary income tax rates, currently reaching as high as 39.6%. In addition, these distributions increase your exposure to the 3.8% surtax on net investment income, as well as other potential adverse tax consequences such as the personal exemption phaseout (PEP). Furthermore, you must begin taking RMDs from your traditional IRA accounts after you reach age 70½—no exceptions.

Once you convert to a Roth, "qualified" distributions after five years are completely exempt from income tax. Qualified distributions, for this purpose, include withdrawals you take after age 59½, that are made because of death or disability, or are used for a first-time home purchase (up to a lifetime limit of \$10,000). And you don't have to take RMDs during your lifetime no matter how long you live.

You may be able to contribute directly to a Roth IRA, but that option is phased out for upper-income taxpayers. A conversion may be your only viable route.

If you're thinking about a Roth

Take 7 Financial Steps In A Second Marriage

Marrying again after divorce or the death of a spouse may offer great personal benefits.

But it also can lead to financial complications, especially if you have children from your first time around.

However, the blessed event doesn't have to be ruined by family squabbles. Discussing matters openly and deploying a range of estate planning strategies can help you develop a plan that meets your needs. Here are seven steps to help move you along:

1. Open the lines of communication. Before you tie the knot, be up-front about your concerns and preferences. Talk to each other about your intentions and how you expect to pass along assets to other family members, including any children and grandchildren. You might find it helpful to include an impartial person, such as your financial advisor, to "broker" the talks.

Consider this checklist of points to discuss:

- Existing financial obligations (for example, a promise to pay for a grandchild's education);
- Plans for future support and funding for retirement;
- Guardianship of any minor children; and
- A prenuptial agreement protecting your personal interests.

2. Conduct an inventory. Now is a

conversion this year, you might consider waiting until later this year to understand any proposed tax changes resulting from the new administration. If you decide to move forward, you may want to limit the amount converted so it doesn't move you into a higher tax bracket. For example, if you expect to be in the 25% bracket and have another \$50,000 to spare before crossing into the 28% bracket, you could take this opportunity to convert \$50,000 from your traditional IRA to a Roth. Not only is that amount below the thresholds for the 3.8% surtax and PEP,

good time to compile a list of your assets. This may include: stocks, bonds, mutual funds, and other investments; amounts that you've transferred to trusts; retirement plan and IRA funds; and proceeds that will be available from life insurance policies. Also, review any agreements made during the course of your first marriage. For instance, if you were required to name your then-spouse as the beneficiary of your retirement plan accounts, you may have less flexibility than you thought.

3. Consider the variables. Not everything is cut and dried. It's up to you to decide which assets, if any, you will commingle with your new spouse's. Keep in mind, though, that the laws of your state also may come into play. For instance, in community property states, the law presumes that assets will be owned jointly. But most states mandate "equitable distribution," calling for property to be distributed fairly, but not necessarily equally. Also, you'll want to factor in your age and health status, as well as those of your spouse.

4. Pay attention to titles. The way that property is titled, both prior to marriage and after, can have a profound effect. For example, setting up accounts as joint tenants with rights of survivorship (JTWROS) will make it clear that assets will go directly to the other named person, such as your spouse, when you die. But if a title

the tax rate is limited to 25%. You then could repeat this strategy over multiple years to keep your tax liability at a reasonable level.

Finally, you're holding another tax card up your sleeve: If it suits your needs, you might decide to "recharacterize" part of the converted amount back into a traditional IRA. This could be a good idea if the value of the account declines

significantly after the conversion. You have until the tax return due date for the year of the conversion plus extensions to recharacterize, giving you plenty of time to make an informed decision. ●

names you as the sole legal owner of assets, they'll pass to your estate and not directly to your spouse.

5. Name your beneficiaries. If you're entering a new marriage you'll likely need to amend your existing will or replace it entirely. In particular, it's important to review the beneficiaries you've named for various assets in the will. Also, take a look at the beneficiary designations in documents for all of your retirement plans, IRAs, and life insurance policies. Those beneficiary designations take precedence over whatever may be in your will.

6. Show some trust. Your estate plan may include one or more trusts, which can be useful in transferring wealth to children of an earlier marriage while imposing some constraints on the recipients. Here are a few possibilities:

Bypass trust: This vehicle could be designed to provide income to a surviving spouse, with the remainder of trust assets going to other designated family members.

Q-tip trust: With a qualified terminable interest property (Q-tip) trust, a surviving spouse may receive income, but not principal, when the owner dies, with children receiving the remainder from the surviving spouse's estate.

Spendthrift trust: As the name implies, this trust can be helpful in restricting beneficiaries' access to assets until they reach a specified age or meet other requirements.

7. Don't forget about taxes. Last, but not least, it makes sense for both of you to consider how to minimize estate tax on the federal and state levels. That likely means use of the generous estate tax exemption (\$5.49 million in 2017) as well as the "portability" provision allowing a surviving spouse's estate to benefit from the unused portion of a deceased spouse's exemption. Such provisions could be included in trust documents or other estate planning devices.

The second time around, it's more important than ever to seek expert assistance from your estate planning advisors. Don't hesitate to contact us. ●

Compare Minor's Account To 529 Plan

Until the Section 529 college savings plan came along, parents looking ahead to the high cost of college for their children often set up accounts under their states' Uniform Gifts to Minors Act (UGMA) or Uniform Transfers to Minors Act (UTMA). But the broad benefits of 529 plans have made them more popular than UGMAs and UTMAs in recent years. Here's how the two saving vehicles compare:

UGMA/UTMA accounts: These are custodial accounts to which you contribute money for a minor's benefit. As the custodian, you control the investments until the child reaches age 18 or 21, depending on the laws of your state.

However, for tax purposes, any earnings on account assets are taxed to your children at their lower tax rates. For 2017, the first \$1,050 of earnings in a custodial account is tax-free and the next \$1,050 is taxed at the child's rate. But earnings beyond \$2,100 are generally subject to the so-called kiddie tax—they're taxed at the parents' top rate. And whether you pay or your child pays that tax, it creates an

annual drain on the account during the years you're trying to build up funds for college.

Section 529 plans: With this type of state-sponsored plan, you contribute to an account for which you name your child as beneficiary.

Then you're in charge of how the money is invested (though only among the options the plan offers, and the ability to switch investments is limited). Unlike in a custodial account, earnings from investments aren't taxed while they're accumulating. And distributions from the plan that go to pay qualified college expenses, such as tuition, also aren't taxed.

Those provisions give 529 plans a dramatic advantage over a custodial account. There aren't any kiddie tax complications with a 529 because the growth in the account you've set up for your child isn't taxed at all during the years leading up to college. And whereas you may owe capital gains tax

when you sell investments in a custodial account to pay college expenses, that doesn't happen when you take money from a 529 to pay for college.

In addition, if your kids have a custodial account, they get control of the money once they reach the age of majority in your state—and they can use it any way they want, not just for college. That doesn't happen with a Section 529 plan—you stay in control of the account regardless of the age of the beneficiary.

A final disadvantage of a custodial account is that it may hurt a student's eligibility for federal financial aid because it counts as that student's asset, not that of the parents. Section 529 plans, in contrast, are treated as if they belong to the parents and aren't likely to affect financial aid eligibility.

Feel free to reach out to us to determine what type of account is the best fit for your situation. ●

Trump's Tax Reform Plan

(Continued from page 1)

to adjust the taxable basis of inherited property to its value at the death of the person making the bequest. This so-called step-up in basis may reduce capital gains taxes on inherited assets. The proposed changes could cause income tax complications for some taxpayers.

6. Repatriation tax. Tax revenue has shrunk in recent years due to so-called "tax inversions," through which multinational companies relocate their headquarters in a foreign country to avoid paying higher U.S. taxes. Trump has advocated a one-time tax repatriation holiday rate for corporations that would let them pay a tax rate of 10% on income brought

back to the U.S.

7. Child care. The current tax law attempts to help beleaguered parents through a child tax credit (CTC) and a dependent-care credit for certain child-care costs. Low-income families may benefit from the earned income tax

credit (EITC). Trump would overhaul the rules and institute a new deduction for child-care expenses, increase the EITC, and create tax-favored dependent care savings accounts, among other changes.

Many more changes could be in the works. For instance, Trump has advocated repealing the alternative minimum tax (AMT), the benefits for "stretch IRAs" that let inheritors spread out distributions over their life expectancies, and the 3.8% surtax on "net investment income" authorized by Obamacare. ●
